

STAR-K KOSHER CERTIFICATION

January 14 2026
25 Teves 5786

Airping LLC
dba Shabbos Air Solutions

Letter of Certification

To Whom It May Concern:

This is to certify that the pneumatic entry system made by **Shabbos Air Solutions** is approved by STAR-K for use on Shabbos and Yom Tov subsequent to the following conditions:

- This approval is location-specific.
- Once installation has been completed, STAR-K will conduct a thorough inspection and verify that the system was installed correctly. STAR-K will then issue a *separate* site-specific letter of approval.

The system provides non-electric keyless door access to residential dwellings, apartment buildings and commercial establishments. Compressed air is used to notify occupants of a request for entrance to a locked structure, enabling visitors to access a building without having to press an electric buzzer.

Using the Shabbos Air Solutions system on Shabbos and Yom Tov

To contact a resident, a visitor should follow these steps:

1. Check to see that the green indicator light is on. If it's red, wait a few seconds until it turns green.
2. Press the pneumatic button at the entrance for 2 seconds. This sends an air signal to the residence.
3. Wait for the resident to respond. Once the resident grants access, the air may take up to 10 seconds to travel to the front door before the door unlocks.
4. Look for the confirmation strobing light that will be exposed for a few seconds, indicating that the door is unlocked.

This certification is valid through December 31 2026, and is subject to renewal at that time.

Sincerely,

Rabbi Moshe Heinemann
STAR-K Rabbinical Administrator
